

CALL FOR PAPERS

Symposium on Dynamics and Control of Time-Delay Systems

The 6th ASME International Conference on
Multibody Systems, Nonlinear Dynamics and Control
September 4-7, 2007
Las Vegas, NV, USA

The Technical Committee on Multibody Systems and Nonlinear Dynamics is sponsoring a symposium on *Dynamics and Control of Time-Delay Systems* at the 6th **ASME International Conference on Multibody Systems, Nonlinear Dynamics and Control** in Las Vegas, NV.

Papers are solicited in all areas related to theoretical, computational, symbolic, and experimental aspects of dynamics, vibration and control of linear and nonlinear mechanical systems and structures involving time delay. Modeling, novel analysis techniques, response, stability and bifurcation analysis, optimization, and development of control algorithms are some of the topics of interest. Application papers dealing with structural elements, micro-mechanical systems, manufacturing and machining, and computer controlled mechanical systems are invited. Contributions with experimental investigations are especially welcome.

The papers with the e-mail address of the authors must be submitted to one of the organizers before **February 19, 2007** (in PDF format). Accepted manuscripts will be published in the conference proceedings on CD-ROM.
