

**CALL FOR PAPERS**  
**Sixth ASME International Conference on**

**Multibody Systems, Nonlinear Dynamics and Control**

ASME 2007 International Design Engineering Technical Conferences  
Las Vegas, Nevada  
September 4-7, 2007

**Second Symposium on Railroad Vehicle System Dynamics**

Papers are solicited in the area of railroad vehicle system dynamics. The subject of the papers includes, but is not limited to wheel-rail contact, railroad vehicle system dynamics, numerical simulation for railroad vehicles, design and optimization of wheel and rail profiles, rail supports, railway noise, rail and wheel measurements, wheel-rail stress and fatigue analysis, wheel-rail wear problem and experimental analysis for railroad vehicle dynamics.

Papers must be submitted electronically in a PDF format as described in the conference web site by **February 19, 2007**. All papers will be reviewed and, if accepted, will be published in the conference proceedings on CD-ROM. For further information, contact the organizers of the symposium:
