Numerical Computing
Math 4800, Spring 2016

Instructor: W.D. Henshaw (henshw@rpi.edu)

Late Homework Policy:

1. homework is due at the beginning of class of the day it is due.
2. homework handed in up to one day late will be penalized by 20%.
3. homework handed in between one and two days late will be penalized 50%.
4. no homework will be accepted after more than two days late.
5. if there is some good reason that you wish additional time to hand in the homework then arrangements must be made in advance and not after the due date. Being busy with other classes is not a good reason for requesting additional time.

Appealing Grades:

1. Grades on homework or exams can appealed during office hours.
2. There is a one week time limit on appealing grades.

Academic Integrity:

The Rensselaer Handbook of Student Rights and Responsibilities defines various forms of Academic Dishonesty and you should make yourself familiar with these. In the case of problem sets, collaboration between students is encouraged. However, each student must write his/her own solutions and submit his/her own problem sets. Copying someone elses solution or Matlab code is not allowed. In the case of exams, there is no collaboration of any kind permitted. If cheating is suspected, then an explanation will be requested. If the explanation is not satisfactory, then an exam grade of zero will be given and a report will be made to the Dean of Students.
