thermal management in piezoceramic sheet actuators”, *Intelligent Materials Systems and

polymer composites for structural damping”, *Journal of Materials Science* 41, 7824-7829
(2006). Cited 83 times

electrochemically controlled transport of water through carbon nanotube membranes”,

31. W. Zhang, V. Sakalkar, and N. Koratkar, “In situ health monitoring and repair in
Cited 83 times

droplets on superhydrophobic carbon nanotube arrays”, *Applied Physics Letters* 91,
023105 (2007). Cited 169 times

33. Z. Wang, Y. Ou, T.-M. Lu and N. Koratkar, “Wetting and electrowetting properties of
carbon nanotube templated parylene films”, *Journal of Physical Chemistry B* 111, 4296
(2007).

34. Z. Wang, L. Ci, P. Ajayan and N. Koratkar, “Combined micro/nanoscale surface
roughness for enhanced hydrophobic stability in carbon nanotube arrays”,

35. L. Chen, Y. Zhang, N. Koratkar, P. Jena, and S. K. Nayak, “First principles study of
interaction of molecular hydrogen with Li doped carbon nano peapod”, *Physical Review
B*, 77, 033405 (2007).

2008

[This paper was highlighted by 2010 Nobel Laureate Dr. Konstantin Novoselov in his 2010 Keynote Address to the MRS Fall Meeting]

2010

2011

    [5th most downloaded Nano Letters paper in January/February 2011]

    Most downloaded Nano Letters paper in the entire 3rd quarter of 2011.
    This study was also featured by *Nature* (Volume 476, Page 255, 2011) in their research highlights section (doi:10.1038/476255f).

2012

This paper was also featured in their News and Views Section: “Unobstrusive Graphene Coatings” Nature Materials 11, 182-183 (2012).

[This paper was featured in Nature Nanotechnology: “Going to new lengths” Nature Nanotechnology 7, 413 (2012).]

[6th most cited paper published in Nano Energy Journal]

173. Z. Yue, T. Gupta, F. Wang, C. Li, R. Kumar, Z. Yang, N. Koratkar, “Utilizing a graphene matrix to overcome the intrinsic limitations of red phosphorus as an anode material in lithium-ion batteries”, *Carbon* 127, 588–595 (2018).
