Numerical Methods in Fluid Dynamics  
Math 6890, Fall 2019

Instructors:

- W.D. Henshaw (henshw@rpi.edu, Amos Eaton 304)
- D.W. Schwendeman (schwed@rpi.edu, Amos Eaton 306)

Late Homework Policy:

1. Homework is due at the beginning of class of the day it is due.
2. No late homework will be accepted unless an extension has been discussed and approved prior to the due date. Extensions will be approved in cases of illness or other personal/professional issues. Having work due in other classes or deadlines for work set by your research advisor, for example, are not sufficient reasons for an extension.

Appealing Grades:

1. Grades on homework or exams can be appealed during office hours.
2. There is a one week time limit on appealing grades.

Academic Integrity:

The Rensselaer Handbook of Student Rights and Responsibilities defines various forms of Academic Dishonesty and you should make yourself familiar with these. In the case of problem sets (homework), collaboration between students is encouraged. However, each student must write his/her own solutions and submit his/her own problem sets. Copying someone else’s solution or computer code is not allowed. In the case of exams, there is no collaboration of any kind permitted. If cheating is suspected, then an explanation will be requested. If the explanation is not satisfactory, then an exam grade of zero will be given and a report will be made to the Dean of Students.
