EXECUTIVE SUMMARY EEE Projects

1. Project focus
   What is the domain/subject area that you investigated? Why is it important? Who cares?

2. Question addressed
   What is the specific question/issue you investigated and how does it relate to your overall subject area?

3. Overview of Investigation details
   How did you go about answering your specific question or chosen issue? e.g. What approach, research or project design did you undertake to answer your question?

4. Results
   What did you expect to be an outcome of your investigation? What was the outcome?

5. Impact
   What was your plan for achieving an impact? What was the impact? How did you measure it? What could be the impact of your investigation? Why did or didn’t your investigation have this identified impact?

6. Learning
   To what extent did your investigation meet your expectations? What did you learn about a solution to your question/issue? What did you learn about Energy, Environment and the Economy (EEE)?
